MEDALS WON BY W. H. WAITE
INTRODUCTION

We have great pleasure in again submitting to you our annual catalog of Dahlias.

This list is not so large and comprehensive as many others, but it embraces what I consider to be the best varieties in existence today. We are hybridizers and raisers of new varieties, and many of our varieties such as Jersey’s Beauty and Jersey’s Beacon have become standard and known the world over wherever good Dahlias are grown. We could introduce a dozen or so new varieties each year, but our rule and aim is to introduce only what is superior to existing varieties, as our object is to improve the standard rather than mere monetary gain.

Again thanking you for past favors, and assuring you prompt service, no matter how small the order may be.

General Information

ORDER EARLY

Stock of some of the varieties is limited, so to avoid disappointment please order early. All orders will be filled strictly in rotation, stock will be reserved, as the orders are received, and shipped at the time desired.

TUBERS

All orders for tubers will be filled with strong divisions of field-grown tubers. We do not as yet carry any pot tubers.

GUARANTEE

While we exercise every care in the filling of orders for tubers and only send out what we honestly think will grow, we do not guarantee any tuber that is shipped before March 15th. After that date tubers will be guaranteed, and will be replaced free of charge if they should prove blind. Many of the failures with plants and tubers are due to causes entirely beyond our control, such as weather, or soil conditions, bad planting, etc., and while we take the greatest care to send out only stock which will produce satisfactory results, we cannot be held responsible for failure.

We also exercise the greatest care to have all stock true to name, but should any of them prove otherwise, it is mutually agreed between the purchaser and ourselves, that we shall not be held liable for a greater amount than the original purchase price of the stock.

TERMS

To keep down office expenses, I have no charge accounts, and will allow a discount of 5 per cent when cash accompanies order. All other orders sent C. O. D., unless by a special agreement.

POSTAGE

All retail orders amounting to $1.00 or over will be delivered prepaid, on orders for less than $1.00, 25 cents should be added to cover postage. Wholesale orders, packing charges, and postage at cost.

GREEN PLANTS

I have made a specialty of green plants for several years, know how to grow them and how to pack them, and will guarantee safe delivery to any destination within three days' journey from here. Should they not arrive in good condition, I will either replace them or cheerfully refund the money.

TIME FOR PLANTS

I will ship plants any time desired after May 15th, but recommend from May 20th to June 20th as being the best.

Inspector's certificate accompanies each shipment.
Cultivation of Dahlias

Dahlias are easily grown, requiring no special soil or treatment to bring them to perfection. They love an open, sunny situation, but also succeed in partial shade.

Prepare the soil thoroughly by digging 12' to 18 inches deep in the Fall, and then again in the Spring before planting.

If the soil is poor, work in some well-rotted manure in the Fall and apply artificial fertilizer in the Spring—100 pounds to 1000 square feet.

Dig holes 3 or even 4 feet apart and about 6 inches deep; drive a stout stake in each hole and lay the tuber down flat with the crown toward the stake and cover with 2 or 3 inches of soil, leaving the balance of the hole to be filled up later, after the plant comes up.

Plant any time between April 15th and June 15th, the latter date being the best for exhibition flowers.

When the plants have made their third set of leaves, the top should be pinched out, to make them branch. Allow only one plant to each stake.

The most important thing from now on is hoeing and cultivating until the buds appear; this should be done at least every week and after every rain. After the buds appear the ground should be mulched with rotted manure if possible, and a thorough watering should be given whenever the plants require it.

Disbudding the side buds, leaving only the terminal bud to develop, will bring larger blossoms.

After the plants have been blackened with the first frost they should be carefully dug, allowed to dry for a few hours, and stored in a dry cellar or basement and covered with dry sand or soil to keep them from shriveling.

Divide the tubers in the Spring, after the eyes show plainly, being careful that each tuber has a piece of the crown attached with an eye, cover them again and keep dry and cool until planted.

GREEN PLANTS

As there has heretofore been some objection to green plants, I will say that I guarantee my plants to be strong, healthy, and to get to the customer in good condition.

I, and many other growers of fine Dahlias, find from experience that green plants are better than tubers, as they are less liable to become diseased than roots, and they will produce as good, if not better flowers, and also will produce nice healthy roots for the next year.

Dip the root of the plant in water before planting, plant at least 6 inches deep, filling the hole up gradually as the plant grows; it is best to set out the plants late in the afternoon or on a cloudy day, water them well when planting, and if the weather be hot and sunny, shade for a few days with twigs with leaves on them.

The after-cultivation and care of the plants should be the same as for tubers.
Waite's Gardens New Introductions for 1929

JERSEY'S GLORY. Decorative

The flowers are large and of good form, well placed on the stem. The color is best described as a yellow hue of orange. The stems are long and stiff, but sometimes arch gracefully. It is a robust grower and the flowers are produced very freely; the leaves, thick and leathery in texture. The long stems branch freely from the base and the stems may be cut as long as that of Jersey's Beauty.

Tubers $10.00, Plants $5.00
This splendid new yellow Decorative will, I predict, be in the yellow class, what Jersey's Beauty is in the pink. I have watched it closely for the past three years, and it has all the attributes of a perfect Dahlia. This Dahlia while primarily a commercial Dahlia, yet can be grown to exhibition size. I have seen many 9 inches across and from 4 to 5 inches in depth. It has the long, free branching habit of its parent Jersey's Beauty, and a plant pinched once or twice can carry eight to twelve perfect flowers, none less than 6 inches. The stems are more slender than Jersey's Beauty, yet always stiff, holding the flowers erect and at a proper angle for vase work.

Tubers $15.00, Plants $7.50
DATSO. (Cottam) *Decorative*

This is a large, well-formed Decorative. The color is a glowing deep rose pink, a little deeper in color than the Radiance Rose. The stems are perfect and the foliage is a lustrous green, and leathery in texture. It is of medium height and the large flowers are produced very freely. A beautiful Dahlia and very much admired both at the exhibitions and in the garden.

*Tubers $10.00, Plants $5.00*
Waite's Gardens Former Introductions

JERSEY’S CLIMAX. *Hybria Cactus*

Immense flowers of xanthine orange with tourmaline pink reverse. The perfect flowers are borne on fine stems.

**Tubers $5.00, Plants $2.50**
JERSEY'S BEACON. Decorative

This Dahlia has become a universal favorite. As an exhibition flower, it has few equals in its color, but as a garden variety it is even more spectacular. The color is Chinese scarlet, with a paler reverse, giving it a two-toned effect. The flowers are large and globular in shape; it is a vigorous grower and has splendid insect-resisting foliage.

Tubers $1.25, Plants 75c.
JERSEY'S BEAUTY. Decorative
The most popular Dahlia in commerce today. A glorious flower of eosine pink—a color difficult to adequately describe. As a cut flower or for exhibition it is unrivaled. Fine stems and foliage.

Tubers $1.00, Plants 50c.

JERSEY'S CAPRICE. Decorative
A glorious Autumn shade that is hard to describe. Large flowers, fine stems and foliage.

Tubers $2.50, Plants $1.25

JERSEY'S DAYBREAK
Decorative
Hermosa pink shading to creamy yellow in the center. Flowers of medium size, splendid formation, holding the pointed center well to the last. The stems are as rigid as canes and foliage is of leathery texture. Very much admired by all visitors.

Tubers $5.00, Plants $2.50

JERSEY'S ELEGANS
Decorative
Spinel pink, medium flowers produced very freely on good stems.

Tubers $2.50, Plants $1.25
JERSEY'S EMPRESS. Decorative

Large blossoms of anthracene violet which does not fade. The flowers have great depth and good substance. Stems, which are somewhat fleshy, hold the flowers well up.

Tubers $2.50, Plants $1.25

JERSEY'S FIANCEE. Decorative

Rose-pink, with the point of each floret slightly tipped gold. The flowers can be grown to a good size and the stems are always good; the foliage is inclined to be pale and should be kept sprayed to offset the ravages of insects.

Tubers $2.50, Plants $1.25

JERSEY'S GEM. Decorative

Superbly formed lavender pink flowers on perfect stems. A wonderful cut flower.

Tubers $1.00, Plants 50c.
When the flower first opens it is yellow with a coral pink suffusion, but when fully open it is picric yellow in the center and the outer petals coral pink with a gold suffusion. The stems are perfect with good, thick foliage.

Tubers $2.50, Plants $1.25
Select Varieties from Other Sources

ALICE WHITTIER (Reed).  *Hybrid Cactus*

This splendid variety from Massachusetts is indeed an acquisition. The color is a very delicate shade of primrose yellow. The flowers are immense in size for a Cactus, and the stems are good. This variety had the honor to win for the best bloom in the show at San Francisco, a distinction that few, if any, eastern varieties have heretofore won.

Tubers $3.50, Plants $1.75

AMARANTHUS (Broomall).  *Decorative*

Amaranth pink, very large flowers; good stems.

Tubers $7.50, Plants $3.75

AMBASSADOR (Broomall).  *Cactus*

Soft yellow buff, shaded pink. Still one of the best Dahlias.

Tubers $1.00, Plants 50c.

Very large exhibition flower of a pleasing formation and on ideal stems. In color it is a rich primrose yellow with the reverse of the florets touched with light rose.

Tubers $7.50, Plants $3.75

SANHICAN’S PEACH (F. & M.) Decorative
In color it is exactly the shade of a ripe California Peach with a real peach-cheek glow. Its attractiveness is further enhanced by the oddly twisted petals with staghorn tips.

Tubers $5.00, Plants $2.50

SILVERADO (Seal). Hybrid Cactus
This new variety is a splendid acquisition to the Hybrid Cactus class. The flowers are large and of a fine type, and in color a silvery white.

Tubers $5.00, Plants $2.50

SPOTSWOOD BEAUTY. Decorative
This Dahlia has been much admired in our garden the past season. The flowers are of splendid form, light chatenay pink in color. It is a very robust grower and has tough, leathery foliage. Very free from insect pests. The flowers are produced very freely and on strong, upright stems.

Tubers $7.50, Plants $3.75
STARLIGHT (Boston). *Hybrid Cactus*

Pure, unshaded gold is the color. It is a gold shade which combines with everything in the average house decorations. Flower is huge and there seems to be no limit to the size it can be grown. Bushes are fairly tall, robust and branching. Form is excellent, stem is incomparable, long, rigid and carried well above the foliage.

Tubers $15.00, Plants $7.50

THE PERFECT WHITE (Broomall). *Cactus*

Very little description is required when Mr. Broomall selects such a name for a Dahlia. He says it is about the size of Profusion, but very much more artistic in formation.

Tubers $3.50, Plants $1.75

TRENTONIAN (F. & M.) *Decorative*

Beautifully formed flowers in rich brown tones. Splendid stems and fine foliage.

Tubers $1.00, Plants 50c.

VALENTINO (Boston). *Decorative*

The color is true salmon pink, shading to cream at the center. The flower has enormous size and attractive form. Stem is long and upright and grows out of bushes of medium height.

Tubers $10.00, Plants $5.00

VIOLET WONDER (Kemp). *Decorative*

The best violet-colored Dahlia to date. The predominating color is a rich, naphthaline violet with an underlying tone of royal purple. Reverse is bluish violet. Flowers are as nearly perfect as possible, true decorative and of massive proportions, and are borne on long, stiff stems that hold the flowers upright above the foliage.

Tubers $10.00, Plants $5.00

WALDHEIM SUNSHINE (Peacock). *Hybrid Decorative*

This giant Dahlia is one of the very best Hybrid Decoratives. A true, deep yellow that will show up yellow under artificial light. The reflex is darker and there is a rich golden suffusion around the beautiful, full high center. The bush growth is ideal, the strong, erect stems hold the flowers facing upright.

Tubers $15.00, Plants $7.50

WATCHUNG SUNRISE (Smith). *Decorative*

It is a rich, golden yellow suffused amaranth pink towards the outer petals. The flowers are enormous and when fully developed, form a perfect sphere. It is a vigorous grower and the stems are perfect.

Tubers $7.50, Plants $3.75

YELLOW PRINCESS (Fraser). *Decorative*

A sensation wherever shown. This is a beautiful yellow Decorative Dahlia. Habit of plant is ideal, clean, healthy, upright growth, the immense flowers are held well above the foliage on strong stems.

Tubers $7.50, Plants $3.75
The Pompon or Bouquet Dahlia

This splendid class of Dahlias is much in favor, as they are so well suited for all kinds of decorative work.

They are exceedingly floriferous and make fine border plants. In the following list will be found the very best, both for exhibition and garden work.

We only offer tubers of these as we do not propagate green plants of this section.

Hybrid Delphinium. _Perennial Larkspur_

There are few hardy perennials that have the charm of the Delphinium, varying in color from the palest sky-blue to the deepest indigo and in height from 3 to 8 feet.

They are not fastidious in their culture, succeeding in most well-tilled soils.

To obtain the best results, plant them in well enriched soil and give plenty of water during the growing season.

To get immediate results, strong, one-year-old field grown plants should be used, as they possess all of their initial vigor. They should be planted in the Fall or very early Spring, just as soon as the frost is out of the ground.

We have been collecting Delphiniums for a number of years, having purchased stock from all of the specialists, both at home and abroad, and from all of the various strains we have selected the very best, and we now have to offer a fine lot of specially selected, field-grown plants that are sure to satisfy all lovers of this fine, hardy flower.

**Strong, field-grown plants, 75c. each, $8.00 per doz., $50.00 per 100**
Pot-Grown Delphiniums

We are also offering for Spring delivery only, strong, pot-grown plants of the Wrexham strain of Delphiniums. These plants are grown from the very best imported English seed and are the same that we will be using for our own planting. To those who have had difficulty in germinating the seed of this wonderful strain of Delphinium this is an opportunity to get these young unflowered plants, and thus get the initial benefit from them. These plants will all bloom from August until frost, giving spikes from 3 feet to 4 feet in height and the following year they will be at their best.

Plants carefully packed and guaranteed to arrive safely.

$6.00 per doz., $40.00 per 100

NEW BOOK on
DAHLIA CULTURE
By W. H. WAITE

A book full of practical information, suitable for the amateur as well as the professional

SECOND EDITION, PRICE $1.65 PREPAID

The Florists Exchange and Horticultural Trade World gives it the following review:

THE LITTLE BOOK OF MODERN DAHLIA CULTURE

This is unquestionably one of the best and most original of "The Little Book Series." Written by W. H. Waite, one of the most successful of Dahlia raisers in the East, it is notable for its straightforwardness and readable style. Beyond utilizing some previously published information on the chemistry of soils, which is acknowledged, this little volume is the result of Mr. Waite's practical experience. Moreover, while disclaiming any ability as a penman, he demonstrates that he can write entertainingly on an old subject and, at the same time, hand out information that is not generally known. Mr. Waite follows nothing and nobody; he expounds his views clearly and emphatically, not hesitating to directly oppose statements made by others. It is particularly refreshing to read his views regarding propagation from cuttings; incidentally, we have never seen the advocates of split roots come out with such a clear cut exposition of facts as does Mr. Waite for green plants.

The little book under notice, like all others of "The Little Book Series," is well bound in green cloth; it contains 126 pages including the pages at the back for record keeping, and is freely illustrated with splendid halftones, all from photographs taken by Mr. Waite.

Waite’s Dahlia Food

This is the fertilizer we have been using for the past few years. It is a specially prepared and blended food, to give maximum results in the production of fine flowers and good tubers.
